Date:

1. Research products completed during the years of 2013-2015

For each category shown below, list of all research products completed during the years of 2013-2015. List products in chronological order starting with the oldest product at the top. See "Call for Nominations" for operational definition of "completed" research.

- a) Full text articles published or accepted for publication in peer-reviewed journals. (Provide full scientific citation. If "accepted for publication," provide documentation - e.g. acceptance letter from journal - indicating accepted status of this item. Without documentation, the item will not be considered by the review committee.)
- b) Scientific presentations. (Provide full scientific citation.)
- c) Preliminary results or final results from competitive peer-reviewed grant awards. (List title of grant; your role; principal investigator; sponsor; grant number; clinicaltrials.gov registration number. On a separate document, provide an abstract describing preliminary or final results. Without an abstract describing preliminary or final results, the item will not be considered by the review committee.)
- d) Research-related professional service.
- e) Other important scholarly works (for example, clinical practice guidelines, textbooks).

2. Summary of Research Accomplishments

In 500 words or less, summarize your research accomplishments completed during the years of 2013-2015. In particular, discuss the significance, impact, and relevance of this research to chiropractic care.
